

# CHEMGENE

## Absorbent Granules

Designed to lift all fluid based spills, including body spillages (blood, urine, vomit, etc.)

Absorbs up to 50 times its own weight in water

### Chemical Nature

Crosslinked, partially neutralized copolymer of acrylic acid.

### Product Form

White, odourless granules.

pH 5,7 – 6,3

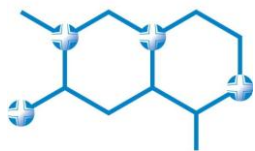

### Storage

Slightly hygroscopic and must be kept in a dry place.

### Product Safety

Superabsorbent polyacrylates have been widely tested and are considered to be non-toxic by ingestion or application to the skin and not irritating or sensitising to the skin.

Testing against various ecological indicator organisms indicates that the material does not represent an environmental hazard.
